

CAREER OBJECTIVE

Aspiring data analyst aiming to grow into a data scientist. Skilled in Python, and data visualization. Seeking to apply analytical skills while upskilling in machine learning to solve real-world business problems.

EDUCATION

Bachelor of Computer Applications (BCA), 2023 - 2026
Accurate Institute Of Management And Technology

Percentage: 65.00%

Senior Secondary (XII), CBSE 2023
Science

Pt.Salagram Junior High School, Gautam Budh Nagar

Percentage: 64.00%

Secondary (X), CBSE 2021
Pt.Salagram Junior High School, Gautam Budh Nagar

Percentage: 74.00%

TRAININGS / CERTIFICATIONS

SQL (Basic) Certificate

Sep 2025

PROJECTS

[Mini Neural Network ↗](#)

Jan 2026 - Feb 2026

Developed a compact multi-layer neural network from scratch in Python using NumPy, featuring Dense layers, ReLU activation, Softmax output, and Categorical Cross-Entropy loss with full forward and backward propagation support. Tested on sample classification data, achieving functional end-to-end training pipeline for multi-class problems.

[Adani-Port-Analysis with Python ↗](#)

Jan 2026

Performed comprehensive data analysis involving data cleaning and mean imputation, followed by building and evaluating regression models for predictive insights. Utilized visualization libraries such as Matplotlib, Seaborn, and mplfinance to create impactful data visuals. Leveraged powerful Python libraries including Pandas and Scikit-learn to transform raw datasets into actionable business intelligence.

[Bajaj-Auto-Analysis with Python ↗](#)

Jan 2026

Developed a compact multi-layer neural network from scratch in Python using NumPy, featuring Dense layers, ReLU activation, Softmax output, and Categorical Cross-Entropy loss with full forward and backward propagation support. Tested on sample classification data, achieving functional end-to-end training pipeline for multi-class problems.

[shopZone: E-commerce-website ↗](#)

Oct 2025 - Dec 2025

shopZone is an e-commerce website developed using Python and the Django framework. The project features a dynamic front end built with HTML, CSS, and JavaScript, and a robust backend powered by MySQL. It also leverages the Django REST Framework for API development and integrates several third-party libraries for payment processing, email notifications, and other essential functionalities.
